3. Description of Proposed Works

Please describe details of the proposed development or works including details of proposals to alter, extend or demolish the listed building(s):

The front light well which only belongs to Flat A , Harrington Square 22, was dangerous and represented a severe health hazard as it was made of iron, but very rusty with holes and sharp edges. It was also very steep and narrow.
The whole estate has different staircases, some made of cement, some made of bricks, some with tiles and of all sorts of shapes and some have fixed storage units underneath the stairs.
Given all these individual characteristics it was not at all apparent that planning permission was required for what principally essential maintenance.
Moreover we have ensured that the visual impression at street level is unchanged as we have refitted the original stair railings and we will restore the severely damaged street level fence.
We have changed the old iron staircase to a cement staircase covered with nice natural stone. We have kept the fence and the railings. We have made a small storage facility underneath the stairs.
The floor of the light well was made out of cement but it was cracked and had holes in it. We covered the floor with nice natural stone in order to be able to clean better. We had rats because the drainage covers were damaged. That is also repaired now. The small storage underneath the stairs serves to prevent our neighbours from hiding underneath our stairs, smoking marihuana etc, and inject themselves with drugs. As you may well know we have Happy Vale Hotel as our neighbours.
We attach some photos from before and your planning officer Gary Bakall has taken a lot of pictures of all the other staircases and our new one.
