2016/3159/P	Hannah Fussner	Flat 8 Russell Square Mansions 122 Southampton Row London WC1B 5AE	26/07/2016 21:49:10	OBJ	I am a resident in the adjacent mansion block, and it is unacceptable that the hotel should be allowed to install new and noisy air-handling units without adequate acoustic shielding. Those units planned for the annex between our block and St George the Martyr church will have no shielding at all, while those on the main building overlooking Cosmo Place will have shielding only on the Cosmo Place side, thus focusing noise toward us. This remains a residential neighborhood, not only in our block but in several more nearby which will also be affected by increased noise. I strongly object to these plans as they stand.
2016/3159/P	Nancy Durham	Flat 12A Russell Square Mansions 122 Sputhampton Row London WC1B 5AE	26/07/2016 09:32:10	INT	I want to object to this planning application. I am very concerned about the noise that will be generated by this new plant. My flat is directly opposite this area and I also have a roof terrace so we are very aware of outdoor noise. Our bedroom is also next to this area. What consideration has been given to shield Russell Square Mansions from noise?
2016/3159/P	john keating	flat 6 Russell square mansions 122 southampton row london WC1B5AE	26/07/2016 09:09:12	INT	Objection to the installation on grounds of noise disturbance to near by residents.
2016/3159/P	Alka Patel	Flat 21 Russell Square Mansion 122 Southampton Row Bloomsbury WC1B 5SE	26/07/2016 16:04:23	COMMNT	I believe that planning permission should be rejected as it seems as though the effect of the added noise for the residents of Russell Square Mansions has not been considered. The proposed addition of the air handling unit is evidently unfair because the Cosmo Place will be shielded whilst the residents of Russell Square Mansion may forced to bare with the sound day and night. The report that was conducted did not acknowledge Russell Square Mansion therefore it cannot be deduced that we will remain unaffected by the placement of the air handling unit.
2016/3159/P	Vijay Patel	Flat 21 Russell Square Mansion 112 Southampton Row London WC1B 5SE	26/07/2016 16:16:40	COMMNT	I strongly object the placement of the air handling units as burden of sound on the residents of Russell Square Mansion has been ignored. The fact that the Cosmo Place are able to have an acoustic shield means that all of the sound will be directed towards the Russell Square mansion. Planning permission should not be granted because the extent of the nuisance created is yet to be deciphered as there was no consideration when the sound report was published.

2016/3159/P	Serena Martin	Flat 12 Russell Square Mansions 122 Southampton Row London WC1B 5AE	26/07/2016 11:01:18	OBJEMAIL	I would like to object in the strongest terms to the proposal to install plant on the rooftop of Bloomsbury Park. We live opposite the hotel and our window looks out onto the roof of the hotel. The proposed air handling units will have no acoustic shielding on our side of the hotel, therefore we will experience significant noise disturbance from installation and ongoing running of the air handling units. The applicants seem to have ignored the fact that their neighbours are a residential block. I am also concerned about the lack of privacy and disturbance caused by workmen on the roof of the hotel both during the installation period, and for maintenance etc as my flat will be directly visible from the roof. I urge the committee to reject this application.
2016/3159/P	Serena Martin	Flat 12 Russell Square Mansions 122 Southampton Row London WC1B 5AE	26/07/2016 11:01:40	OBJEMAIL	
2016/3159/P	SUZANNA WOODS	16 RUSSELL SQUARE MANSIONS 122 SOUTHAMPTON ROW	26/07/2016 13:17:57	OBJ	I strongly object on the grounds of noise disturbance for the residents of Russell Square Mansions. At the moment the building is generally very quiet - shielded from the road and other noise. The proposed plant would be very close to my (and most others') bedroom and sitting room and the noise would be unbearable. There is no shielding proposed on that part of your plan but even with shielding there would be very significant noise nuisance for most of the flats. I thus request this application be rejected.
2016/3159/P	James Baker	11 Russell Square Mansions 122-124 Southampton Row London WC1B 5AE	26/07/2016 11:48:49	OBJ	As a resident of an upper floor flat in Russell Square Mansions, 122 Southampton Row, I strongly object to the proposed plant at the Bloomsbury Park Hotel, as it will be mere few feet away from the windows to my flat and will undoubtedly cause a considerable noise nuisance. There appears to be no shielding between the proposed site of the plant and the flats immediately adjacent. The proximity can be clearly seen in the photographs included in the Proposed Layout document. I ask that the application be rejected.
