2016/2892/P	Gavriel Tatz	109 Francklyn Gdns HA8 8SB HA8 8SB	26/07/2016 14:30:55	INT	We are regular visitors to the area often visiting family members over the weekend. As we have small children this will enable us to bring the little one to the synagogue when they cannot walk. It will also allow us find nearby accommodation other than staying with our family in their house as this is not always possible. As such the Eruv will directly benefit us. Likewise we know of others like us who would benefit. This will be a great benefit to many people and all this with negligible/minimal impact to the local neighbourhood. I hope that this project gets all the support it deserves.

2016/2892/P	Noah Bulkin	8 Grove End Road NW8 9LB	26/07/2016 11:05:23	SUPPRT	<p>I have been a local resident in St Johns Wood for over 5 years and currently reside adjacent to Lords Cricket Ground, with my family including two young children.</p> <p>The granting of this planning application would be transformation for our family - currently, it is almost impossible for my wife to leave the home every Sabbath, as she must look after the children, who are too young to walk by themselves. All three of them are therefore consistently missing out on religious, educational and social experiences, on a weekly basis, and feel almost trapped in their own home.</p> <p>The envisaged Eruv would allow her to bring the children to synagogue every Friday / Saturday. It would also transform our ability to attend lunches and dinners or other social functions with friends / neighbours on the Sabbath, as well as to welcome Sabbath-observant guests with young children to our home.</p> <p>We cannot express in strong enough terms how helpful this would be to our lives and to the lives of so many of our friends and neighbours (as well as visitors) in the area, and how strongly we feel this would enrich the fabric of the social and religious life of the community.</p> <p>We also often host visitors on Sabbath who are visiting people who are unwell and staying in the local hospitals. During what is often a difficult time for these guests in our community, the added difficulty of not being able to carry food, drink, medicines, reading materials, housekeys, etc on the Sabbath, when walking to visit someone in hospital, is a very substantial and unfortunate extra burden.</p> <p>We have personally benefited tremendously from Eruvs in other adjacent communities, as well as in North London, and many communities in the United States and elsewhere, when visiting.</p> <p>In our experience, the necessary poles, as envisaged in this planning application, cause no disruption or visible blemish to the community whatsoever, and a casual observer would generally not even notice the presence of any of them at all. I can say that I have spent many Sabbaths in North London, Miami, New York and elsewhere and I cannot ever recall having even seen one of the Eruv poles. They very discreetly blend in to the background, as would those envisaged in this application.</p> <p>The ability for all members of our religious community to be able to share fully in the religious, social and educational aspects of Jewish life on the Sabbath without being forced to infringe on religious law is a principle which we feel is extremely important, and we have personally experienced throughout many communities in London and around the world how this can be achieved with an Eruv, without causing any disruption or blemish to the area whatsoever.</p> <p>We strongly urge you to support this application and thank you humbly for giving our unique concerns such careful consideration.</p>

This will enhance the quality of life of many residents in the area who currently suffer from limited mobility on Saturdays. On the other hand it represents no detriment to the general public. Approval will also permit my wife and I to leave our home for all other social or leisure activities within walking distance without infringing Sabbath laws.  As the committee may already know, there are already hundreds of eruvs around the world and numerous eruvs in London already in place, so through this planning application we are not proposing anything new. 2016/2892/P	A Ries	46 armitage road	26/07/2016 20:01:05	SUPPRT	The erection of sets of poles will pose no planning problems that I can understand. they will be barely visible to anyone passing and they will be placed in locations especially selected for minimal impact. However they will bring huge benefits to those people who choose to live an orthodox Jewish life - allowing them to participate fully in religious, communal and family activities with their young children and those who need to use a stick or wheelchair, or need to take important medication with them. in other words it will be virtually invisible and totally inoffensive and irrelevant to those who don't need it, yet make a world of difference to those who do need it. In addition it is important to note that sets of poles erected in other boroughs have been extremely successful, with no change at all to the existing nature of the area.

2016/2892/P	Sara Elias	65 Springfield Rd London NW8 0QJ	26/07/2016 19:23:42	SUPPBOBX I	The creation of this Eruv will be of enormous benefit to many within the Jewish community of this area while not affecting in any way the lives of people who have no need for it. It will be enormously helpful to the mental health of mothers who currently are unable to wheel buggies to synagogue on the sabbath and who therefore miss out on seeing friends and family and connecting with their community. The difficulty of not being able to participate in this, the most important day of the week for observant jews, can not be overstated. Likewise for the elderly who are only able to get around using a wheelchair or similar. I can only see benefits and no disadvantages to the creation of this Eruv.

2016/2892/P	Howard Calvert	12 blenheim road London Nw80lu	26/07/2016 18:42:36	SUPPLETTER	I completely support this application for the erection of these poles and connectors and the planning application. It is of benefit to many families in the area and in no way would offend the quiet enjoyment of the area in any way as they will be hardly visible. Please support and grant this application. Thank you Howard Calvert

2016/2892/P	Ashley Rogoff	Flat 19 14 Northwick terrace London NW8 8JB	26/07/2016 18:30:58	SUPPRT	The proposal has the full support of my wife and, providing a valuable addition to the enjoyment of the Sabbath, without affecting anyone who does not wish to benefit from it. I have previously lived in another borough which has the benefit of an Eruv and have seen how this has improved the life of many people, young and old, sick and disabled. I hope the application will be passed at your next meeting.
2016/2892/P	cathy Burkeman	32 Queens grove	26/07/2016 17:49:15	PETITNSU PP	It would be simply wonderful to finally get what we need (while every other faith community needs are largely met, no matter what) , and all that without disturbing any one else. Real democracy and respect of all cultures, not just some. I live in hope of fairness and justice, thank you.

2016/2892/P	evan	20 abbey road	26/07/2016 15:53:12	SUPPRT	this is the most wonderful thing that could happen to our neighborhood and long awaited, a true upgrade enabling us to have the ability to visit friends and neighbors throughout Friday night and Saturday. It will provide much needed help for the elderly and needy as well, which is wonderful.

2016/2892/P	Philip Goldsmith	3 Biddulph Rd w9 1ja w9 1ja	26/07/2016 10:38:59	INT	The construction of the Eruv will dramatically increase the quality of my life, allowing me to push my infant on Sabbath (Saturday) without breaking Jewish laws. The visual impact will be slight. Thousands of neighbourhoods around the world have erected Eruvs - Barnet, Edgware, New York & Cape Town as examples - and these have proved successful for the local communities - both Jewish and non-Jewish.
