Subject: 15 Adeline Place 2016/1964/P

Dear Samir and Planning,

We see that planning has been granted for 15 Adeline Place, 2016/1964/P, but the full revised application is not up on the website and we do not know the basis on which the permission has been granted.

This is essential since there were so many objections, and it was a flawed application to begin with.

The revised plans submitted on 4/7/2016 are mainly plans and drawings, not very detailed, and information on construction management.

There are no noise assessments or details of exactly what is now planned for the roof terrace, which is you remember were among our major concerns.

What can you tell us about these?

We need to know exactly what guidelines are so we can keep a close watch, and report any violations for the purpose of enforcement.

Where can we access the full details of the final application on which permission was granted? And in which the roof terrace and condenser/noise issues are specifically dealt with.

Thank you very much,

Dr Kaori O'Connor 118 Bedford Court Mansions WC1
