2016/3571/P	Brian and Tessa Evans	7 Evangelist Road	28/07/2016 14:48:25	COMMNT	<p>The application is for a substantial first floor extension on top of the main existing rear extension, similar to one recently built at No. 13. In contrast to a previous application (2015/6603/P) it no longer includes proposals for a first floor roof terrace or a second floor extension. We are pleased to note these changes.</p> <p>While we have no objection in principle to the proposed development, our main concern is that it should not compromise our ability to construct a first floor extension of similar dimensions to that proposed for 9B. Also, given that the new window in the south elevation of the proposed first floor extension directly overlooks our property and garden we ask that it should be of frosted glass.</p>
