

## FAQ-C / RZQSG Seasonal Classic

Wall mounted units are able to be fixed to almost any wall, leaving space for furniture, decoration and fittings. Wall mounted units have modern looks, and reduced size and weight, making them a discreet option for many applications.

Comfort levels in a room can be improved due to new airflow and air discharge settings, accessed via the wired remote controller. The controller can also be set to restrict room occupants from changing settings, preventing over-heating or cooling. Wall mounted units and Seasonal Classic condensers can be used as cost effective replacements for old equipment as they are able to use existing R22 and R407C pipe-work.

## Wall mounted

## FAQ-C / RZQSG

Features	Benefits		
Automatic airflow volumes control	Adjusts fan speed to match difference between room and set temperature, unit works smarter without need for occupants to change settings		
Vertical and horizontal auto-swing	Allows better air and temperature distribution, giving a room more uniform conditions		
D3 connection as standard	Allows integration of split system into Daikin building management systems		
R22 Replacement technology	Re-use of existing R22 and R407C piping possible, allowing only fan-coil and condensers to be replaced		
Install flexibility	Piping can be installed in one of 6 positions on the unit, giving greater flexibility of siting the unit on a wall
