2016/3874/P	Craig Duncan	74 Durdans House	06/08/2016 14:13:24	OBJEMAIL	<p>The "new owner" of the market is being rubber stamped by Camden Planning for anything he wants right now - from the Hawley Wharf travesty to the Dingwalls/Camden Lock changes and now the Stables! You are basically allowing him to up rentals and force out the diversity which historically has always been part of Camden Market. For this I object to your approval of this plan. This specific areas repurposing will again force out more diverse food traders - See these articles for further examples:</p> <p>https://you.38degrees.org.uk/petitions/keep-camden-town-food-market-independent http://www.camdennewjournal.com/food-stalls-market http://www.standard.co.uk/news/london/stallholders-fight-gentrification-of-camden-s-street-food-marke-t-a3273051.html</p> <p>The ongoing corporate homogenization of Camden Market is disgusting and is at complete odds with the spirit of the place. The fact that certain self serving Labour career politicians are giving "Teddy and co" the green light on all these "re-developments" is shocking! Presumably considerable political backhanders are involved? I have already contacted our current Mayor of London to ask for his involvement in this. Please put a STOP to this erosion of a very valuable area of cultural diversity.</p>
