2016/2892/P	Ohana	Heathfield Gardens 30 nw11 9ja nw11 9ja	08/08/2016 07:29:33	COMMNT	The eruv (clear wire) is needed and wished
2016/2892/P	Marc Levy	Flat 39 Cavendish House 21 Wellington Road NW8 9SQ NW8 9SQ	05/08/2016 12:57:04	COMMNT	<p>Dear Sir or Madam,</p> <p>My wife, son and I have lived in the area for the last 3 years and we have recently had a sone (who is now 1 years old).</p> <p>We are strongly in favour of the proposal and this will literally change our lives, our connection with the community and the ability to observe our religion. Very practically, this will enable my wife or I to actually attend services on Friday evenings and Saturday for both prayers (as is required in the Jewish faith) as well for social events either at friends or in the community that are within walking distance. We able to see, enjoyalso know many people within th earea (both family, friends, neighbours) who would now be able to walk to, see and enjoy with. This includes a number of elderly people who have limited mobility other than by wheelchair. Today, this is not an option.</p> <p>Furthermore, our son, who is not able to walk yet will be able tot benefit from going outside (within the pushchair) and also be able to leave the property and enjoy in other social and religious events as well as to play with other children during these times.</p> <p>It is also hard to understand for a borough as well regarded as Wesminster, why this is not already available today. There are a number of "eruv" already available in London, other prominent cities round the world and hence it is difficult to understand why we can not make this available in Westminster.</p> <p>On a practical note, the actual set up of the poles will have virtually no implication to social cohesion or to the landscape. Having walked around Westminster as well as the neighbouring areas to NW8 (e.g, W9, NW6, NW3) etc) I can assure you this will not have any negative implications. Hence, residents and visitors today will hardly if at all be affected.</p> <p>To reiterate, this is a unique opportunity for NW8 and surrounding areas to really create a step change in the quality of life for its residents and community. Create more social integration, provide a very real and tangible benefit to its residents and target the groups who would gain the most from mobility (elderly, children). We therefore, urgent and encourage you to accept the proposal and accept this opportunity.</p>
2016/2892/P	Joel Shamash	18 Cumberland Terrace London NW1 4HS	07/08/2016 11:34:43	COMMNT	I believe this would be a positive thing for the community and promote social cohesion rather than aggravate it as it is a clear statement that all faiths are welcome and supported in our community. Also, it will allow wheelchair users to be able to attend synagogue on the Sabbath or holy days. Finally, I do not believe the proposed poles and clear nylon wires will be a notable eye sore.

2016/2892/P	Tony Harris	7 Allandale Avenue N3 3PJ	06/08/2016 17:37:11	COMMEMP ER	<p>If you allow the use of clear nylon filament then I cannot see how you could object to residents running fibre optic cables between buildings and across public highways to transmit data thus negating the need to pay BT and cable companies for their services. Plastic fibre optic cable is effectively the same as proposed.</p> <p>This would be a great forward step.</p> <p>I cannot see how you could object to ordinary residents if you allowed the eruv.</p>
