2016/3495/P	Eva Spector	The Garden Flat 11 Elsworthy Terrace London NW3 3DR	09/08/2016 13:51:52	COMMNT	<p>I object to the proposal for many of the reasons outlined by other local residents i.e.:</p> <p>Building in gardens defeats the purpose of a Conservation Area.</p> <p>The proposed building is out of character .</p> <p>It would destroy the "green corridor" from Elsworthy Road.</p> <p>However, I would like to add:</p> <p>1) The construction of the 15 Elsworthy Terr/25 Elsworthy R. property took many years. I was unable to have full utility of my garden due to the noise and dust. The piledrivers used to excavate were particularly intrusive, due to the vibrations, and were extremely disturbing. Furthermore the lorries and portacabins caused significant parking and traffic problems. The heavy traffic was unsuitable for residential areas. I am handicapped and the pathways were frequently blocked.</p> <p>2) The property in question was given planning permission to be as high as the original garages. This was clearly exceeded.</p> <p>without any consultation. I am concerned about any subsequent amendments which Camden planning did not appear to feel were worthy of public examination.</p>
