2016/2892/P	Nicola Rosenfelder	14B Elizabeth Mews London NW3 4TL	10/08/2016 00:56:08	COMNOT	I fully support the erection of an Eruv. I have young children and a disabled step son and the Eruv would allow us to go out as a family on the Sabbath more easily. I am a doctor at the Royal Free Hospital and the Eruv would also help many patients and their relatives to carry personal items such as clothes and toiletries, as well as food, to appointments or when visiting, respectively. Eruv poles are barely visible and I have struggled to find the poles of existing Eruvs.
2016/2892/P	Arielle Scemama	37 Fairhazel Gardens	09/08/2016 21:59:20	SUPPRT	I fully support this application as it will -help young families -help disabled people -help people in hospital -help sick people -help old people. For example, it will enable people to bring medicines, necessities and gift to one another on Saturdays and other religious holidays. I used to live in an area which had an Eruv. I never noticed it or knew where it was, but it helped the Jewish community a lot by its existence, and didn't bother anyone else. A. S.
