2016/3622/P	Patricia Nolan	Flat 3 22 Belsize Square	10/08/2016 18:59:54	OBJ	<p>Error in architect design statement: this is a 4 storey house with 5 flats. The proposed building is not just over the conservatory site but extended further over the garden. The rear of the garden is separate and owned by Flat 2 (currently covered in pastic grass) which does not seem to be shown on the plans. Since I have lived here a mature tree screening the cluster of ugly extensions at the back was felled and a small tree planted in its place which has subsequently died. There is no greenery at all in Flat 2 garden, and a few low shrubs at the end of Flat 1 garden. Belsize Square has a long avenue of mature trees at the back but which peters out when it reaches us, where every space has been taken to insert small houses or extensions. I have a clear view of these from my rear windows and balcony. Thus I object to the new use of land for yet another extension which I consider too large for the garden space and would impact on surrounding houses and future residents. I would however approve an extension on the footprint of the old conservatory.</p>
