Waste Comments

Thames Water have reviewed the documentation provided and cannot agree to the discharging of Condition 34.

Water Comments

Supplementary Comments

This site falls within the highly flood sensitive Counters Creek Catchment. The drainage strategy supplied requires enhancement to demonstrate the pre- and post-development points(s) of connection and peak flow rates for both foul and surface water off the site. We need clear demonstration that there is a net reduction in combined flow entering the public sewer system and that surface water is addressed in accordance with the London Plan Policy on Surface Water disposal.

Yours faithfully
