Removable hardwood timber bollard

1/2

Type	Removable / lift out
Material	Timber / wood
Fixing	Root fixed

[Copy spec](#)

Woodscape's Removable Bollards allow or restrict vehicle access and are suited to private parking and pedestrian walkways, and are made from Naturally Very Durable Hardwood. A 30mm through hole is incorporated for a lifting bar (supplied on site by others).

They are manufactured to an exceptionally high standard and require little or no maintenance.

Removable stainless steel sockets are fixed 500mm into the ground and the bollard goes in 400mm to the socket.

A padlock and key can also be supplied, with fire brigade padlocks also available.
