**Subject:** Application reference 2016/3397/P Garden flat 76 Parkhill Road London NW3 2YT

Attn Conor Healy planning officer

Dear Mr Healy

My husband and I have received the planning application for work to the property next door to our house which is the maisonette basement and ground floor at 78 Parkhill Road.

I attach photographs of part of the site to be developed along the boundary wall of our garden.

As you will see from the photographs below old London Stock bricks are used throughout our garden including the boundary wall. The applicants will need to raise up and extend the garden wall to accomodate their kitchen and dining area by infilling up to the end of the cottage in the back garden of number 76. The last two photographs show this very clearly. I would ask that the brickwork necessary to achieve this should be in old London stock. The backs of houses of nos 78 and 76 are entirely built in London stock bricks as is Sickert's studio at the end of the two gardens. My husband and I would object to the use of any other type of brick. We feel strongly that the use of old London stock should be a condition attached to any planning permission granted to the applicants.

Please acknowledge receipt of this communication.

Yours sincerely,

Joyce and Tim Jeal
