| 2016/3787/P | John Campbell | 46A Goldhurst Terrace London NW6 3HT | 17/08/2016 13:18:51 | OBJ | <p>I object on the grounds that the proposal would have a detrimental impact on the amenity of my flat by blocking lights and the view.</p> <p>The dictionary definition of amenity is:</p> <ul style="list-style-type: none">•Any tangible or intangible benefits of a property, especially those that increase its attractiveness or value or that contributes to its comfort or convenience.•An agreeable way or manner; courtesy; civility: the graceful amenities of society.•Any feature that provides comfort, convenience, or pleasure:• The quality of being pleasing or agreeable in situation, prospect, disposition, etc. <p>The view:</p> <p>The proposed extension will effect my enjoyment of the garden. I have a patio directly next to my back window at 46a where I like to be, especially in summer. This is next to the area of the proposed extension.</p> <p>This extension would change spoil my enjoyment of a favourite area of my garden by both the blocking of view and the casting of my patio into shade.</p> <p>View:</p> <p>The general view from inside my flat, through the back window will be further interrupted. The proposed extension would greatly reduce the view to the left of the window, by blocking the view across the right hand side of the Green Triangle.</p> <p>Light:</p> <p>Sunlight that enters my bathroom and back bedroom comes from that direction, the building of the extension will still considerably obstruct general illumination and this will further diminish the light levels entering an already dark, poorly naturally illuminated flat at 46a.</p> <p>This is a conservation area and I object to any extension being built as by being proud of the line of the terrace it will block a much loved and highly valued view of what is locally called 'The Green Triangle'. Any extension here would set a precedent that could encourage others to do the same and blight the area. If a similar extension then happened at 44 I would be boxed in.</p> |
