2016/4136/P	Kamal Pawa	11 Maresfield Gardens	18/08/2016 09:43:24	OBJ	<p>We live in a flat that directly faces the construction area. We object for the following reasons:</p> <ul style="list-style-type: none">- Construction period of 42 weeks, of which 23 weeks will be demolition, excavation, underpinning, piling, and basement construction is very long.- Residents in neighbouring buildings will be disturbed and inconvenienced. Privacy of neighbours will be affected- There will be much more noise and dust from the plant and construction equipment. Neighbouring residents cannot open windows while works are going on due to noise and dust.- There will be many more trucks on the street, safety issue- Parking will be affected during construction, we will not be able to park near our building as lorries and other construction-related vehicles will park near 9 Maresfield Gardens- There will be lots of building materials and refuse for an extended period affecting safety and hygiene- There will be more one-bedroom units in 9 Maresfield Gardens after the construction which will change the current quiet and family-oriented neighbourhood in Maresfield Gardens. The additional units and occupants will cause over-crowding.- Parking availability will be reduced in the future. Although the new units are “car-free,” the new residents will find ways to circumvent the rules and take up scarce parking space on the street.
