Application No:Consultees Name:Consultees Addr:Received:CommentResponse:2016/4143/Pvallery tchukovFla 5.1. Zigurat Building 0-66 Saffron Hill London EC1N 8QX2008/2016 15:25:33COMMNTDear Sir/Madam, I am writing to object to the above planning application. I Live on the fifth floor of the adjacent building (60-66 Saffron Hill) and my windows face north and west, directly towards and to the side of the proposed extensions. Apart from the disruption and the deterioration of quality of life, which building works would inevitably cause, my main concerns are:1. Reduced direct sunlight and obstruction of free travel of light. My flat presently sits just above the roof line of 67-74 and enjoys uninterrupted views, reflected in its higher purchase price.2. Further loss of ambient light.3. Further increase of light pollution - already a substantial problem for residents facing the south side elevation of 67-74.4. Intrusive loss of privacy. The back windows of the proposed rear elevation extension would face my windows from a distance of less than 7-8 metres.Yours faithfully, Y. Toukov						Printed on:	22/08/2016	09:05:08
