2016/4208/P	Michelle Carrick	Flat 2 32 Mornington Crescent London NW1 7RE	26/08/2016 14:16:02	OBJ	<p>I live at 32 Mornington Crescent and object to the proposal of the expansion of Greater London House. With the existing service section (recycling, rubbish bins and delivery area for trucks and courier vans) for the building being in Mornington Crescent , we currently already have a high number of delivery trucks and refuse collection trucks every day, and I feel that with increased business activity that will come with the expansion proposal, this will only get worse. The proposal should it go ahead will bring with it even more rubbish and recycling activity, something which, as I say, is already a major problem for the Crescent.</p> <p>Also the building works that will go on will be a major disruptive factor bringing more air and noise pollution for an extended period of time.</p> <p>As it is we are already being asked to contend with extra vehicles associated with the HS2 project.</p>
