Diagram of works / vehicle crane position

Site specific instructions

Spoke to Harry & recommended a 281 or a 242, 282 would be a case of it would go around the corner or it wouldn't.

Continuation sheet? Y/N

1. The hauler / driver should ensure that there is suitable safe access and hard standing to positions indicated by the client for the crane lorry and its outriggers.
2. The hauler / driver must ensure all Health and Safety Regulations are complied with to enable safe working.
3. I/we confirm all necessary arrangements for the installation of the above building(s) and Safety Requirements have been identified.
4. This document will form part of the Safe Working Method Statement for the installation of the building.
