

Dear Planners,

2016/3949/P Portacabin at LSU

The current need for the 3 year extension of this portacabin classroom is understood. However, it should not become a permanent structure.

The proposed use of trellises and creepers should soften its impact.

2016/4298/P 80 photovoltaic panels on flat roof of Brookfield Primary School

The Conservation Area Statement says that 'No equipment will be mounted on a roof slope fronting a highway' which means that they should not be visible from the street.

Many thanks,

Eileen Willmott
