2016/4401/P	Phillip Ingamells	139 Cholmley Gardens NW6 1AB	04/09/2016 09:12:13	OBJEMAIL	<p>Dear Mr Lester</p> <p>I wish to strongly object against this planning application on the grounds of noise; both during and, especially, after the proposed works are carried out.</p> <p>The proposed new external flue is to run along and up my bedroom wall. The noise from the current boiler house vent is loud enough, but to have this noise funnelled, and echoed, along my bedroom wall would be intolerable. Noise level surveys conducted so far have only examined external and ambient noise. The effect of funnelled noise along a bedroom wall, coupled with the vibrations and echoes involved, will produce a completely different set of noise levels.</p> <p>I do not feel the other options for this flue have been properly explored and the leaseholders effected by this proposal have most certainly not been consulted during the planning process.</p> <p>Sincerely Phillip Ingamells</p>
