Your comments on the planning application

I am wiring to object to the application to relocate the chimney, currently on top of the stand lone boiler house, to the proposed position - the proposed location is right outside my flat, and attached to the wall alongside my flat.

This will leave a chimney a few metres at most from my back bedroom / study. The current chimney is 15-20 meters away, and as i write i can hear noise from it. The new chimney location will be right outside my back window, and will carry gasses and noise continuously.

Planning Application Details

I find this unacceptable, as it will make it (a) difficult to work from home as i do often in my study, and (b) difficult or impossible for anyone to sleep in that room.

I am also very concerned about the air / gas pollution effects of having the chimney right outside my flat, especially as i often leave the windows and back door open to compensate for the very warm nature of the flats. Both for noise and pollution reasons, it will completely change my living comfort if i am unable to have these windows and door open, as i must stress the flat gets very warm for much or most of the year.

I am also disappointed that the most affected residents have had no consultation over what was being proposed, whether it was acceptable, what the impact would be, and what considerations had been made.

I would stress again how often i keep the back door and windows open for fresh air reasons, and for creating some airflow through my property....this is particularly important as this is not really a option on the front side of the flat given the excessive traffic noise from Mill Lane - leaving those windows open is not possible for more than 2 minutes - the noise is excessive and intolerable beyond that. Hence the need to open up the back of my flat - the chimney right outside my back window and balcony will make this effectively very difficult as well, and do not feel why i should feel a prisoner in my own residence.
