| 2016/1355/P | Fatima Aboagye | 2 Streatley Flats Streatley Place | 05/09/2016 21:35:33 | OBJCOMP AP | <p>Residents of 1 - 4 Streatley Flats, situated just behind Heathside School have complained to Camden Council because of the alarming levels of noise we are facing from Heathside School.</p> <p>The school changed the use of the auditorium in their original planning application document approved by Camden Council into 2 classrooms and are ruining the lives of the residents of 1 to 4 Streatley Flats with horrendous noise levels.</p> <p>There are also privacy issues with the school children regularly hanging out of what is supposed to be the schools Fire Exit and peering into our flats and garden. It is now impossible to use the garden because of the combined noise, overlooking and large amounts of debris being thrown into the garden from the school. It is also impossible to work during the day in our flats, as our flats have now become part of Heathside classroom, because of the excessive noise from the lessons.</p> <p>During the planning consultation phase we were assured by the lead Architect and Melissa when we raised concerns about potential noise issues, that the space would be used as an auditorium and we would not face much noise, which is far from the truth.</p> <p>Camden has still not addressed these current issues.</p> <p>If Heathside is granted permission to make more changes their noise issue will continue to affect more properties behind the school.</p> <p>If nothing is done I will escalate this matter further.</p> |
