

Data Sheet

Seed Mix Type A

Seed for extensive green roofs with sedum-herb (grass) vegetation

Technical details and properties:

Material: Approx. 19 herb types and, on request, 1 type of grass on the basis of RSM 6.1

Specific properties:

- Seed quality as per FLL quality requirements for the composition of wild plant seeds from reproduction stock
- Minimum seed purity greater than 75%
- Minimum germination capacity greater than 70%

Delivery form:

In breathable cloth bags for either 500 or 1000 m² (grass seeds packaged separately)

Quantity per delivery unit:

For 500 m ² :	228 g herb and 50 g grass seeds
For 1000 m ² :	455 g herb and 100 g grass seeds

(also available without grass seeds on request)

Area of use:

For extensive green roofs in conjunction with sedum shoots

Installation

Spread the seed evenly over the vegetation layer and rake in over the surface. Ensure the seeds are embedded in the surface through appropriate compaction. Thoroughly water the surface area. Maintain irrigation until the seed germinate and develop adequate roots.

(See also Optigreen instructions for completion care)

Storage:

Dry and protected from frost
