

## St. Ann's Church - roof penetration method:

### **Installation:**

Please see above the DC cable roof penetration method for slate. Dektite Multicable Solar Flashing, suitable for slate. This replaces a whole piece of slate. **The flashing will be installed underneath the solar panels so will not be visible.**

### **Decommissioning:**

To remove, simply remove cable and flashing and install a replacement slate in its place. This is a very basic roofing job to replace the slate.
