

WINDOW DETAILS FOR 111D GOLDHURST TERRACE

Existing glazing bar details: Glazing bars are approximately 20x30mm with 4mm glazing as shown in the photographs below.

The new glazing to the windows will be slimline double glazed units, as such the new glazing bars to the new windows will match those as above in size and style.

Additional details have been submitted to show the general sizes of the proposed units construction, the units will be designed with materials to match the existing timber frames and will be finished to match the existing units.
