2016/3404/P	Mrs D Edwards	20 Calverley Grove N19 3LG	12/09/2016 17:45:59	OBJ	I'm appealing on behalf of my elderly mother who lives at 2 Newlands. She will already be affected by the loss of light to her property by the building of an 11 storey block yards from her front door. This will add noise nuisance from the proposed sub station also yards from her door. Both of these are unacceptable considering she is 92, lives alone and suffers from dementia. Her kitchen is already darkened due to the monstrosity being built on the adjoining site and now she will have to endure the persistent hum of an electricity sub station - what next? The ground floor of Newlands houses a number of vulnerable elderly and disabled tenants - whose idea was it to make their last days on earth unbearable by taking their light away and imposing 24 hour a day noise with a sub station? This is unacceptable and we have not been consulted on this matter at all.
2016/3404/P	J Trimmer	4 Newlands Harrington Street London NW1 3SJ	12/09/2016 18:12:59	OBJ	1 floor's higher than was first told. This new block already reduces the daylight /or lack of daylight to my home and it is only a third built. So to have a substation placed in front of Newlands were the landscape gardens should be is not acceptable there is already a substation to the left at the rear of Cartmel , can this not be an option to extend that station or are we to be isolated . Flats 1 to5 Newlands entrances to our homes face the rear of this building project and are hoping that the our foreground is not to be used for a service run for the shops or other services to the new buildings.
