Informative(s):

- 1 Reasons for granting permission.

The proposed alterations are considered an acceptable addition to the host property. Planning permission is sought for the installation of two air conditioning units

The proposed air conditioning units are to be sited at the rear of the property within

a basement light well. As the units would be sited within a later addition to the property and not the original listed building part they are not judged to have a negative impact on the host Grade II listed building or the surrounding conservation area.

The Council's Environmental Health team have been consulted and have not raised an objection to the noise of the proposed A/C units based on the provided acoustics report. However they have advised on the inclusion of conditions to limit the amount of noise created by the units and also the noise created by the machinery during construction.

No objections have been raised in relation to the works. The application site's planning history and relevant appeal decisions were taken into account when coming to this decision.

Special regard has been attached to the desirability of preserving the listed building, its setting and its features of special architectural or historic interest, and to the desirability of preserving or enhancing the character or appearance of the Conservation Area, under s.66 and s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act 2013

The proposed development is in general accordance with Policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy, and Policies DP24, DP25 and DP26 of the London Borough of Camden Local Development Framework Development Policies.
