2016/4875/T	S. Gailey	37 South Hill Park	13/09/2016 19:49:40	COMMNT	I would like to comment about the elm tree at the back of the garden, which is overhanging our garden at No. 37. It has never been pruned and is stopping water getting to the rear of our garden and thus drying out and killing our plants and trees at the rear. We would be grateful if it could be trimmed down so it no longer overhangs our garden.
