2016/4875/T	Beverley Griffiths	37 South Hill Park NW3	14/09/2016 10:43:34	COMMNT	Our garden at 37 South Hill Park backs on to 27 Parliament Hill. The large elm tree close to the shared border extends for up to 6 feet over our area and we have asked before that this tree be pruned and the extending branches be removed to protect out garden. The tree has increased greatly in breadth and height over the last 40 plus years. you might consider that the excavation of the garden level at 27 could undermine the tree and cause collapse to their property in the case of adverse weather conditions.
