Dear Laura

We have submitted several objections in the past to this and its many related planning applications. We are in full agreement with the detailed objections raised by Dr Glynn in his email to you of 12 September and fully agree with the detailed objection submission of the Bloomsbury Association of 29<sup>th</sup> August. As residents whose sole home overlooks the rear garden of 106 Great Russell Street we have serious concerns about the affect on the extremely valuable plane tree, which of course has a TPO, and the affect of the proposed building work on our immediate living environment. What is needed, as we have pointed out several times in previous objections to these planning applications, is a full remedial and repair action on the disgraceful state of this listed building together with normal pruning action on the tree which has been completely neglected for many years.

Regards

Kevin and Ulrike Fogarty
