2016/4936/P	Anup Patel	201 Wendling Haverstock Road NW5 4QY NW5 4QY	19/09/2016 11:44:32	OBJEMPER	The consultation for this proposed change of use has not consulted the residents of Ludham or the neighbours. This has been railroaded by Camden by using their own officers and councillors for consultation and not the people that actually live in the area.
2016/4936/P	Birgit Lambrechts	25 Ludham	20/09/2016 00:00:45	COMMNT	<p>Instead of using the vacant parking for a mushroom farm it would be better used for storage spaces for the inhabitants of Ludham.</p> <p>I'm worried about the health implications of putting a mushroom farm under a residential area. There is specific guidance from the Health and Safety Executive (HSE) on the risks of mushroom farming and we have still not been sent any details of a risk assessment.</p> <p>There is also the possible excess traffic that goes with it. I presume that the mushrooms need to be picked up at some point of the day and there is no information available on this either. In other words you wants us to make a decision without giving us any practical information. You should have called a meeting with the residence of Ludham and the surrounding estates and explained the plans in depth before sending us a planning application.</p>
