2016/4784/P	Tracey Lee Wingrove	26 Lancaster Grove NW3 4PB NW3 4PB	16/09/2016 13:28:04	AMEND	I understand the desire to increase living space, but I object to the total paving over of the back garden in the above proposal. For ecological reasons we should try to avoid paving over green spaces where possible because it impacts wildlife and increases heat absorption into the hard surfaces. It also alters flood water run-off which may cause more water to build up in roads and then drains overflow and/or may cause homes to be more vulnerable to flooding. Specifically in this garden if the total area is paved the water will run off into adjacent gardens. My garden is directly behind and is already damp in that area. May I suggest that they include a patio area for sitting and make the rest of the garden lawn and/or flowers and shrubs.
