Your comments on the planning application

I wish to object to the planning application for the vacant garages to become a mushroom farm.
It is totally unacceptable that garages beneath a residential block are being considered to be transformed into a mushroom farm.
I understand the proposal is for the mushrooms to be grown on Straw, Old Newspaper, Coffee beans and other material. The Ludham estate has a problem with mice and cockroaches in their garages which Camden Pest Control have been out to treat on numerous occasions. Does the council consider it a sensible idea to cause more of an

infestation of these pests, if old newspapers, straw and other organic matter is being used. It will be a haven to attract pests.

In addition the smell of the mushrooms will be a problem. The hours of opening stated on the application are inappropriate. 7am - 3pm on a Saturday. We live on the ground floor and consequently are directly above these garages.

Finally the biggest concern is the health risks associated with mushroom farming. It is known that it causes respiratory problems as a result of the dust and spores. In our family we have two members who suffer with Asthma and dust allergies. In our block there are other young people who also suffer with serious breathing conditions.

I do not believe Mushroom Farming is appropriate under a residential block because of the risks and problems stated above. I strongly object to this planning application.
