Dear John

I hope the consultation period for Condition 4 (Landscaping) has now been concluded with respect to the above property.

In order for me to purchase the required plants for the planting season by end of October and make the fixed planters for the design, are you able to indicate whether or not the proposed design is likely to be approved. I appreciate that your answer will not be official until the full 8 weeks have passed, but if I wait the full 8 weeks since the application in late August, then I will miss the planting season this year.

Regards

John
