2016/3930/P	Griebel	2 Gladys road West Hampstead London NW6 2PX	22/09/2016 12:51:48	COMMNT	<p>The second of the two blocks is too high for the road and surrounding buildings .5 stories is too high . Its design is too bulky and lacks any finesse or attractiveness At the moment the first floor is set back on these delightful row of small shops.Which have a very human scale and are inviteing.It will completely overshadow the muse houses behind and the surrounding shops/houses.It will make the road over shadowed by the extra floor . No affordable housing/rental that I can see. Flats far too small and dense , no extra amenities for the vast increase of people. Shop units too large for the road , problems for rubbish and deliveries. Where will lorries park and deliver ?We need diverse shops with affordable rents in the area ,not chains. This is a single traffic road with a very well used bus route, that serves many schools and 2 hospitals ,how will that be effected while it is being built and then when rented out .The traffic plan drawn up for the huge development round the corner , has never been adhered to , how can you ensure this one will be.There can not be large lorries blocking the road ,backing traffic up to West End lane . The area can not sustain such vast amounts of people ,with out investment into the infrastructure and transport. West Hampstead Tube station is most of the time over crowded ,it is now dangerous all rush hours . The tree in the garden , which is an open space for this block of buildings has a tree in it with a preservation order on it ,which Camden put on .We need our trees in West Hampstead and we have lost vast amounts of them in all the over development .There is nothing wrong with this tree other than the developers don't like it Please protect it .</p>
