

# Future Vodafone site 13775 3G coverage

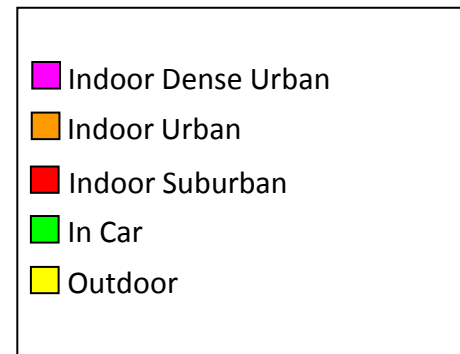

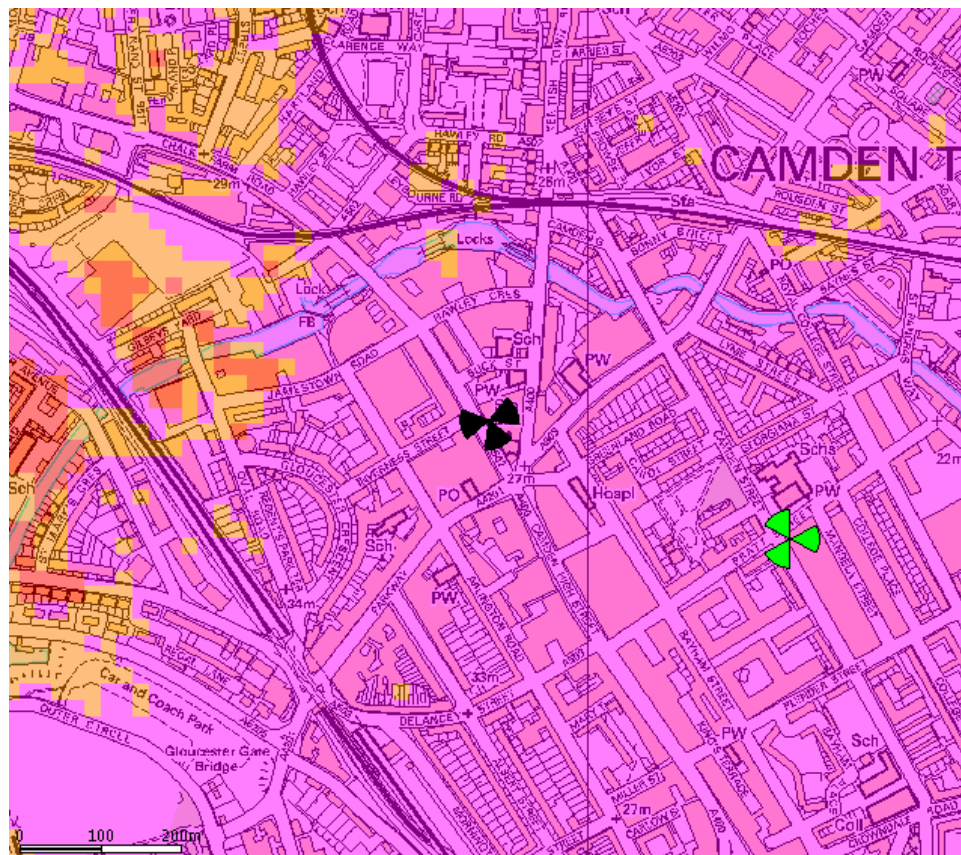

London Design Team

# 3G existing coverage without VF site 13775

# 3G future coverage with VF site 13775

# Conclusions

This new site aims to improve 2G and 3G coverage around Camden Underground Station.

We are providing improved throughputs for users by adding new technologies and adding additional spectrum which will allow a better quality in terms of the customer's perspective. This site is also vital as this area has not got many telecom sites due to limited available candidates
