2016/4936/P	Simon Murrell	143 Waxham	27/09/2016 22:55:06	COMMNT	<p>I strongly object to this proposal.</p> <p>There has been no risk assessment.</p> <p>The company have no experience and have never run a mushroom farm before. I very much doubt that they also have the relevant expertise, which of course would be gained by experience.</p> <p>It appears that there is a certain amount of misleading going on too. In the Camden new journal, the company claimed they had a mushroom farm in Lambeth, but upon contact stated that it was due to be a showcase but wasn't ready yet and was a mess. This leads me to distrust the company.</p> <p>There are numerous health and safety risks; Lung conditions caused by spores, vermin, fire risk from straw, vehicles accessing.</p> <p>These risks would be under flats, within an estate and next to a children's play area, TRA hall, shops, Lismore circus gym and green area.</p> <p>Concerns regarding noise and smells.</p> <p>It has no benefit for the local community and there are many far better uses for this space which the community would be happy with and which would also benefit them. One has already been proposed by the estate services manager before this application. Do different departments of the council not communicate? Is there no planning?</p> <p>This application has already been rejected a year or so ago.</p> <p>There has been no consultation.</p> <p>It is a disgrace that having already been rejected, that not only are tenant's views being ignored but there has been no consultation.</p> <p>Please reject this planning application.</p>
