2016/3968/P	Nicola Fleet	27c-g Ferncroft Avenue London Nw3 7pg	28/09/2016 14:36:10	OBJ	<p>This is showing a complete disregard to us residents and the wildlife and can't believe this is even being considered.</p> <p>I often stargaze in the evening and this will surely effect my viewing with light pollution, lights from my house shine into my garden when on, so the height or angle or whatever you are thinking will not make a difference and I will still be effected. I don't want to see a flood light from my house or garden. This will disturb wildlife in the area, we have bats and tawny owls that regularly use the area as well as other wildlife and you will scare them away.</p> <p>This is a quiet RESIDENTIAL area, you will be causing unnecessary noise in the evening. We have it already during the day with all the building constructions, leaf blowers and so on and so enjoy the peace, tranquility and darkness of a evening.</p> <p>You will also be more causing parking issues.</p> <p>I was going to suggest if you wanted to play in the winter evenings go to Golders Hill Park Tennis Courts, but they too don't allow unnecessary light pollution and close their courts at dusk during the winter months.</p>
