2016/4083/P	George Michael Willans	Flat 3 44 Goldhurst Terrace	29/09/2016 17:27:42	OBJ	We really do wish to object to this proposed extension. We believe that work has already started at this property. We have lived with building work in our immediate vicinity for over 2 years. No 61, 65 and 67, all right opposite our flat, have all had basement excavations done. We have had to endure noise pollution, ie drilling, transporting of the earth from the ground, grab lorries (taking up several parking spaces), hammering, shouting workmen from 7am till late. We have had enough. In addition No 46 and no 48 have had major building works done over the last year. Not to forget Flat 1, 44 GT, 2-3 years ago spent 3 months drilling into the ground to give the flat increased ceiling height. It would be greatly appreciated if the Council could look at all that is going in this area and take some control. Thanks.
