2016/4109/P	E. Slotover	55 Lady Somerset rd	30/09/2016 11:26:52	COMMNT	<p>I would like to object the planning proposal for the following reasons: The site of the so called Railworkers Club is not a brownfield site. The current development on the site was only granted after appeals and had a stringent 106 legal agreement attached to the planning permission! So as the site stands it is already a overdeveloped compromise as the one storey railway club was replaced with several more 4 storey buildings. There is hardly any green space left! The proposed 4 storey development would even more minimise the green space that is left. Nobody in the community would benefit in a positive way from this development as it is not affordable housing and Camden would get no contributions for education, open space etc Just more pollution, noise and overcrowding! The Camden planning department already granted on one more floor at the current development with an additional planning permission which the developer got after the building work started and for which no Section 106 contribution were payed as there was no legal agreement attached to it. Best regards, Elisabeth Slotover</p>
