2016/4803/P	Sonia Corral	28 Isokin Lawn rd London Nw3 2xd	30/09/2016 20:52:58	PETITNOBJ E	I utterly object to the installation: ugly, and deleterious tonpeoples health!!!!
2016/4803/P	Susan Green	23B Primrose Gardens	01/10/2016 11:52:30	COMMNT	There is currently insufficient scientific evidence of the safety of installations that emit electromagnetic fields to human health. However, there is evidence that where there is remuneration involved there may be bias in the assessment and subsequent decision-making process.
2016/4803/P	Susan Green	23B Primrose Gardens	01/10/2016 11:52:46	OBJ	
2016/4803/P	Lee Proctor	9 Hambrook Court Ingestre Road NW5 1XB	02/10/2016 15:22:47	OBJ	I am really worried and very concerned about how many antennas are being installed in camden. i am very worried for my health. and they are also really unsightly.
2016/4803/P	elizabeth sarkany	20 tanza road london NW32UB	02/10/2016 17:49:56	OBJEMAIL	'I am very worried by the idea that there might be phone masts too close to my house. I know that many people say they are safe but I do not think we know enough about mobile phone radiation to say that and I am really concerned about the effect it might have on my health'
2016/4803/P	Gudrun Stenbeck	Flat 1 46 Parkhill Road London NW32YP	02/10/2016 17:04:21	OBJ	I am against the installation of additional phone masts in our area. These phone masts are in the middle of a residential area and too close to my house. Although many say they are safe, I do not think we know enough about long term effects of mobile phone radiation to conclusively conclude that this is the case. I am really concerned about the effect it might have on the health of my family, including my kid.
2016/4803/P	Rosamund Irwin	23 Troyes House Lawn Road NW3 2XT NW3 2XT	30/09/2016 13:58:19	COMMNT	I object strongly to this application, firstly because this is a conservation area and and the masts would look extremely ugly and out of place. Secondly because the building is low rise and is therefore an inappropriate site for a base station. Thirdly there is absolutely no proof that it is safe to place these masts directly above where people are sleeping! The outcome of the effects of long term phone mast radiation is unknown. In fact recent research suggests we should be cautious. Are we to be guinea pigs? Asbestos was considered perfectly safe, smoking was approved of, and having a full English breakfast everyday was meant to be good for you! So please do not try to reassure me with out of date websites!! I am extremely worried about this proposal and sincerely hope you find a more suitable site for this installation.
