2016/4803/P	Eleonore Codron	8A Lawn Road First Floor Flat NW3 2XS NW3 2XS	05/10/2016 21:31:11	COMMNT	I am against the installation of new antennas next to my flat. There is continuous research of negative effects of radiations on humans and particularly babies and I am the mother of a 1 month old girl.
2016/4803/P	Gabriele Balducci	Flat 2 24 Upper Park Road Nw32ut London	05/10/2016 21:13:17	COMMNT	E scrivi you do not want telecom masts there is no need as coverage is good and effects of radiations may be dangerous to health
2016/4803/P	Lorenzo Battarra	16 Lawn Rd Flat 3	04/10/2016 20:04:05	OBJ	Living a few houses down Lawn Rd from the installation site, I am very concerned about the installation of these antennas. I believe that, since negative effects on health have not yet been ruled out by scientific research, the council should adopt a strict precaution principle and avoid putting our health in danger, by finding a better suited location for these antennas.
2016/4803/P	Matteo Spinosa	8A Lawn road First floor flat	05/10/2016 20:21:38	OBJ	am very worried by the idea that there might be phone masts too close to my house. Especially as we had a 1 month old baby me and my wife do not want her (and us) to be exposed to mobile phone radiation
2016/4803/P	Ruth Tamir	82 Lawn Road London NW3 2XB	05/10/2016 17:10:41	COMMEMP ER	We have lived exactly opposite Troyes house and are extremely worried about the plans to install a base station and 6 phone mast antennae It is unsafe - unsightly abs in a conservation area this is highly inappropriate
2016/4803/P	Barbara Hezelgrave	18 Constantine Road Hampstead NW3 2 NG NW3 2 NG	05/10/2016 15:42:32	OBJLETTE R	I strongly oppose the proposed erection of Telephone masts on Troyes House, Lawn Road .NW3. not only for the obvious aesthetic disadvantages on such a low rise building , within a conservation area, but for the negative health impact this could potentially have on young children, those people with already compromised immune systems and the elderly. As a health professional working in the area I see many cases where people attribute their ill health to Electro magnetic radiation /mobile masts , and hear much anecdotal evidence from patients ' not feeling well' worsening symptoms ' since mobile phone masts were installed. There are surely more appropriate locations , further away from residential properties that could be considered thereby avoiding unnecessary and the possible negative impact to health .
2016/4803/P	Kate LAWrence	179 Kneller Road TW2 7DY TW2 7DY	03/10/2016 09:34:39	COMMNT	'I am very worried by the idea that there might be phone masts too close houses and offices. I know that many people say they are safe but I do not think we know enough about mobile phone radiation to say that and I am really concerned about the effect it might have on peoples health'
2016/4803/P	Steven Gurhey	Troyes House	05/10/2016 21:55:57	OBJNOT	I am very worried by the idea that there might be phone masts too close to my house. Every time I walk out of my front door I will be faced with this base station just 4 meters away from me. I know that many people say they are safe but I do not think we know enough about mobile phone radiation to say that. I live in a Conservation Area and far less significant applications get rejected.

2016/4803/P	Corine Thibault-Rimmer	26 Downside Crescent Flat 7	05/10/2016 10:06:58	OBJ	I am very worried by the idea that there might be phone masts too close to my house. I know that many people say they are safe but I do not think we know enough about mobile phone radiation to say that and I am really concerned about the effect it might have on my health.
2016/4803/P	Alexander Back	5a lawn rd london nw3 exs	04/10/2016 23:13:31	OBJEMAIL	concerned with the levels of radiation from the masts. object to them so close to our property
2016/4803/P	michael johnson	3 upper park road	05/10/2016 12:12:34	OBJ	I would like to strongly object to this proposal. There are clear health and safety concerns with this kind of installation (particularly given the number of children/ infants in the house and vicinity), and have a clear negative impact on property prices in the vicinity. The property sits within a conservation area and this installation is not necessary and highly damaging to the immediate community.
2016/4803/P	michael johnson	3 upper park road	05/10/2016 12:12:20	OBJ	
2016/4803/P	Don Stewart	First Floor Flat 10 Upper Park Road	05/10/2016 10:03:09	OBJ	I totally and utterly object to the mobile phone tower/6 antennas proposed for the top of Troyes House. The signals they emit are dangerous to ones health. O2 Have plenty of coverage already in the area so the tower is unnecessary. This is a conservation area and a the tower would look unsightly, I will be able to see it from my living room window.
