

ANNABEL HODIN  
FASHION CONSULTANT

4th Sept 2016

ref 2016/4803P.

I am agreeing to placing 6 antennas  
on the roof of Tynes House for the  
following reason.

- ① I find that there is sufficient O2  
efficiency and coverage throughout Bolog  
Park for and of course I am confident that
- ② there is a harmful effect on health to  
children and adults from the electromagnetic  
radiation which would go into Tynes House and  
the neighbouring residences.

11 ETON AVENUE, LONDON NW3 3EH

- ③. It is too low a site as a base station for a mobile phone antenna thereby restricting its efficacy for wide range or coverage.
- ④. It is unacceptable in a residential area.
- ⑤. It will demerit the beauty of a property and the surrounding area.
- ⑥. It is fuelled by domestic gas from O<sub>2</sub> which should not be considered over the roads, ~~and~~ properties and health.
