

# Future Vodafone site 78813 3G coverage

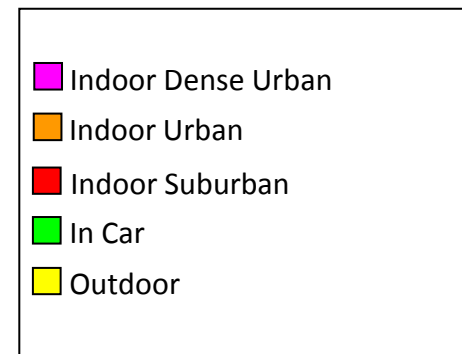

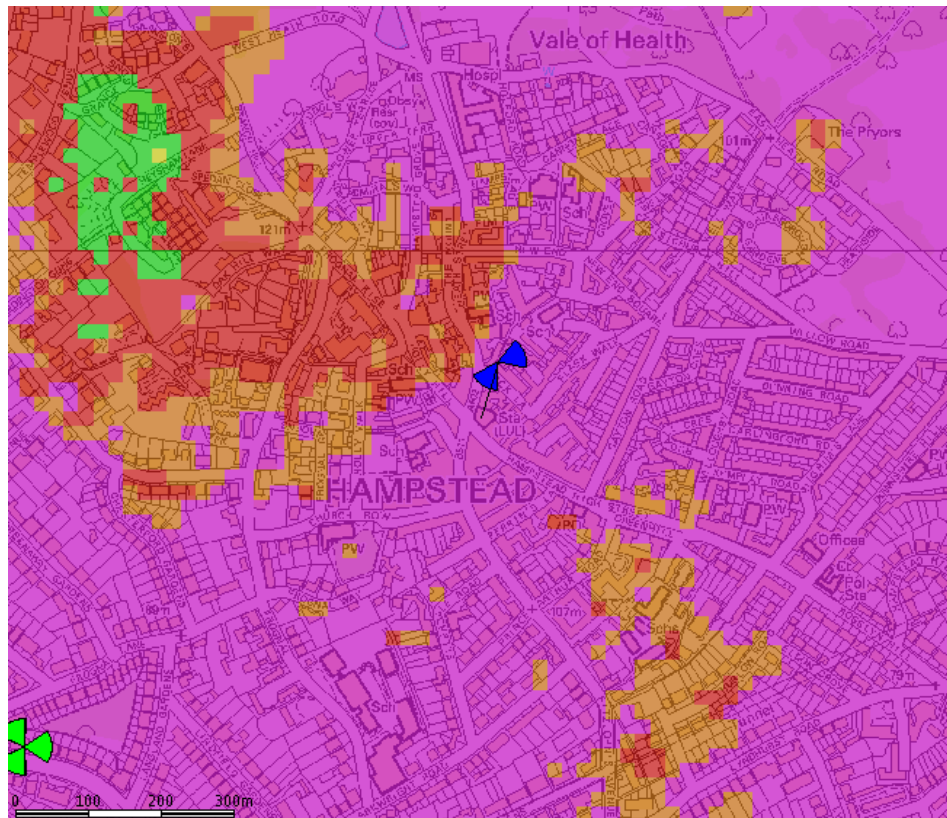

London Design Team

# 3G existing coverage without VF site 78813

# 3G future coverage with VF site 78813

# Conclusions

This new site aims to improve 2G and mainly 3G coverage around Hampstead Underground Station (significantly as per previous pictures).

We are providing improved throughputs for users by adding new technologies and adding additional spectrum which will allow a better quality in terms of the customer's perspective. This site is also vital as this area has not got many telecom sites due to limited available candidates. The location is ideal due to its centrality.
