2016/5181/P	Roger Winfield Kentish Town Neighbourhood Forum	24 Patshull Road London NW5 2JY	13/10/2016 22:55:22	COMMNT	<p>We are pleased to support the principle of the development. We consider the proposal to be an intelligent response to a valuable site; it meets the Neighbourhood Plan's policy of high quality design, and will be an asset to the area.</p> <p>We welcome the concept of providing more employment opportunities, particularly for start-up businesses, and it supports local businesses and employment.</p> <p>We do consider, however, that better use could be made of the party wall with the Autograph building, and of the roof over the double height space. As the blank party wall faces south it should be used to support solar panels or tubes, which could be relocated on the future redevelopment of the adjoining building. A sky garden could be created on double height roof space.</p>
