# 1 Introduction

### 1.1 Context

- 1.1.1 RJT Consulting has been instructed to provide transport planning advice in connection with the redevelopment of 53 to 55 Chalton Street, located in Somertown, London. An existing site layout plan is attached at *Appendix A*, which shows that the development site also has a frontage onto Churchway/Doric Street to the west.
- 1.1.2 The site currently consists of three dwellings, one 2-bed flat and two 3-bed maisonettes. These sit above a NISA convenience store located at the ground level of 396m² below which lies a basement currently used as ancillary storage / offices of 313m².

# 1.2 Existing Uses

- 1.2.1 The NISA convenience store component of the development site has its main entrance onto Chalton Street. Servicing vehicles for the convenience store either park on-street along Chalton Street with goods taken through the main store entrance; or use the rear access onto Churchway.
- 1.2.2 The residential and office components of development site gain access via Churchway.
- 1.2.3 The development site's current uses do not provide any on-site cycle parking.

### 1.3 Proposed Uses

- 1.3.1 The development proposals comprise of a 56 bedroom hotel (1,551m²). Although this scale of development does not meet the local development plan threshold requiring accommodation for service vehicles, coaches or taxis within the demise of the development land, Chalton Street does have space on-street for a small to medium sized coach (size restricted due to width restrictions at Euston Road), and can also easily accommodate taxis for pick up / drop off.
- 1.3.2 The development proposals do not include any cycle parking on site but the intention is to agree with the local highway authority suitable areas to provide either additional or replacement on-street cycle parking stands. According to the standards the required cycle parking is 3 spaces for staff and 3 spaces for customers/guests; so a total of 6 cycle parking spaces or 3 Camden stands.
- 1.3.3 The transport characteristics of the proposed development can be summarised as follows:
  - Pedestrian access via two entrances; one onto Chalton Street and the other onto Churchway with internal lifts and stairs;
  - Servicing vehicles using either Chalton Street or Churchway; and
  - Car free development.
- 1.3.4 This Transport Statement summarises the most relevant aspects of the local development plan, and describes the site's accessibility to the main transport modes, local facilities and attractions. This description is followed by an assessment of the existing uses trip generation; followed by an assessment of the proposed hotel use potential trip generation. A Travel Plan Strategy is then outlined, with conclusions presented thereafter.

# 1.4 Transport Policy

- 1.4.1 As previously mentioned although Camden Development Policies DP14 and DP16 require developments to provide any necessary off-highway pickup and set down points for taxis and coaches, Appendix 2 sets outs the thresholds for developments having to provide such facilities on-site. The threshold being 2,500m², which is greater than the proposed development at 1,551m².
- 1.4.2 However, Appendix 1 of the local authority's Development Policies does require a transport assessment for hotel with 50 or more beds (1,000 sq m), which covers the proposed development, and that assessment is described within this report.
- 1.4.3 DP18 describes the local authority's parking standards which are set out at Appendix 2 and are summarised below for hotels:

C1 – Hotels									
Cycles	Staff – from threshold of 500 sq m, 1 space per 500 sq m or part thereof.								
	Customer – from threshold of 500 sq m, 1 space per 500 sq m or part thereof.								
People with disabilities	Staff/ operational – 1 space per disabled employee or, from a threshold of 2,500 sq m,								
	1 space per 20,000 sq m or part thereof – whichever is the greater.								
	Customer – from threshold of 2,500 sq m, 1 space per 1,250 sq m or part thereof.								
Service vehicles	Required above 2,500 sq m - one 3.5m x 8.5m bay.								
Coaches	Above 2,500 sq m – the Transport Assessment required under policy T1B / Appendix								
	2 will be required to consider the need for space for coaches to pick-up/ set-down								
	and wait.								
Taxis	Pick-up/set-down bay adequate for 2 required above 2,500 sq m, with any departure								
	justified by a Transport Assessment.								
Other staff	Low parking provision areas: maximum of 1 space per 1,500 sq m								
operational parking	Rest of borough: maximum of 1 space per 1,000 sq m								
Other resident	Only considered if supported by a Transport Assessment (or supporting information as								
parking	appropriate for smaller schemes) showing that existing spaces, public transport and								
	coaches/ taxis cannot cater for the expected travel demand, and a Travel Plan can be								
	secured.								

# 2 Accessibility

# 2.1 Transport

### 2.1.1 Roads

- 2.1.2 The development site fronts Chalton Street, an local road with typical urban road characteristics two lane single carriageway, street lighting, waiting and loading restrictions; but does have a 20mph speed limit and relatively wide footways.
- 2.1.3 Chalton Road connects with the A501 Euston Road to the south, and the A400 to the north (via a number of roads). Using the A400 the development site is accessible to the A1 and A41 and from those roads to the A406 and to the M25 beyond.
- 2.1.4 On street car parking and loading is controlled in the area throughout the day with waiting and loading restrictions along Chalton Street and Doric Street/Churchway; and Controlled Parking Zones operating in the surrounding residential streets with some short term visitor parking but mainly residential permit parking.

### 2.1.5 Public Transport

2.1.6 The development site has a PTAL level of 6b – excellent (*Appendix C*) measured from its frontage with Chalton Street. The development site is within easy walking and/or cycling distance of a number of railway stations, Underground stations, and bus stops.

### 2.1.6.1 Trains

2.1.7 The site lies within 7 minutes' walk of Euston, and 8 minutes' walk of King's Cross & St Pancras stations. These stations provide access to International and domestic train services, either directly or through easy connections, to many parts of the UK and beyond.

### 2.1.7.1 London Underground

- 2.1.8 The site lies within 7 minutes' walk of Euston Station, 8 minutes' walk of King's Cross & St Pancras stations, 10 minutes' walk of Euston Square, and 11 minutes' walk of Russell Square. These stations provide access to the Northern Line, Victoria Line, Metropolitan Line, Circle Line, Hammersmith & City Line, and Piccadilly Line; which in turn provide easy access to the whole London Undergound system.
- 2.1.9 Appendix D contains the London's Rail and Tube Service Map.

### 2.1.9.1 Buses

- 2.1.10 There are numerous bus stops (with shelters) located within 3 minutes' to 8 minutes' walk of the development site along Euston Road, Upper Woburn Place, Midland Road, Eversholt Street, St Pancras Road, Euston Road; and King's Cross, St Pancras & Euston stations. Daily bus (and 24 hour) services include the following:
  - 10 St Pancras to Hammersmith 24 hour service

- 18 (N18) Euston Station to Sudbury & Harrow Road Station (continues to Trafalgar Square and Harrow Weald)
- 30 Marble Arch (via Euston Station) to Hackney Wick
- 45 King's Cross to Clapham Park
- 46 Lancaster Gate (via St Pancras) to St Bartholomew's Hospital
- 59 King's Cross to Streatham Hill
- 63 (N63) King's Cross to Honor Oak (continues to Crystal Palace)
- 68 (N68) Euston to West Norwood Station (Tottenham Court Road Station to Old Coulsdon)
- 73 (N73) Victoria (via Euston Station) to Stoke Newington (continues to Walthamstow Central Bus Station)
- 91 (N91) Trafalgar Square (via Euston Station) to Crouch End (continues to Cockfosters)
- 168 Old Kent Road to Hampstead Heath
- 205 (N205) Paddington Station (via Euston Station) to Bow Church (continues to Leyton Drapers Field)
- 214 Morgate (via King's Cross) to Highgate Village 24 hour service
- 253 (N253) Euston Station to Hackney Central (Tottenham Court Road to Aldgate)
- 390 Notting Hill Gate (via St Pancras) to Archway Station 24 hour service
- 476 Euston Station to Northumberland Park
- 2.1.11 Appendix E contains the Central London Bus Route Plan with full timetable details available on TfL's website.
- 2.1.12 Please note that the route maps and details contained in this report are correct at the time of drafting, and are subject to regular review and change by TfL.

### 2.1.13 Walking & Cycling

- 2.1.14 The development site is easily accessible by cycle and on-foot. Although Camden is a busy borough there are relatively wide footways and other pedestrian thoroughfares in the vicinity of the development site connecting the site to many local facilities.
- 2.1.15 There are no designated formal cycle lanes in the immediate vicinity of the development site but there are intermittent cycle lanes in the area and where the road width allows, cyclists can use the designated bus lanes.
- 2.1.16 The surrounding residential roads carry significant less traffic than Euston Road and are well suited for cyclists although on-street parking does restrict the carriageway width.
- 2.1.17 These cycle routes are complemented by a number of cycle stands located on the wider footways to accommodate the current demand.

### 2.2 Local Facilities & Attractions

- 2.2.1 Being located within Somertown the development site has easy and ready connections on foot to attractions such as:
  - Madame Tussauds;
  - London Zoo;

- Regent's Park;
- British Library; and
- University of London.
- 2.2.2 Or via a short cycle or bus ride to attractions such as:
  - Camden Town markets;
  - Regent's Canal; and
  - The British Museum.
- 2.2.3 Or via the Underground to attractions such as:
  - Oxford Street, Leicester Square, Piccadilly Circus shopping districts;
  - Covent Garden including many theatres;
  - Downing Street, Whitehall, Houses of Parliament;
  - Westminster Abbey, St Paul's, Buckingham Palace;
  - St James's Park, Hyde Park, Green Park;
  - The City of London , Tower Bridge, Tower of London; and
  - The Shard, London Eye, and London Aquarium.
- 2.2.4 Taking into account the wide variety of local facilities and the area's excellent connections to central London visitors are highly provided for without having to use private cars.

# 3 Trip Assessment

- 3.1.1 First principles and observations have been used to determine the expectant number of trips for the existing/extant uses and proposed development, based on gross floor areas / number of residential units; and hotel bedrooms. This approach is considered to be more robust than using the TRICS database which has very few if any comparable sites.
- 3.1.2 To keep matters relatively simple, it has been assumed the weekend peak trip generation for all uses will be similar to the weekday peaks, albeit at different times.

# 3.2 Existing / Extant Building Use

- 3.2.1 Generally, local convenience stores attract the majority of their trips from the surrounding area, and any vehicle borne trade tends to be from passing traffic.
- 3.2.2 In the case of the NISA store observations suggest that the store attracts approximately 300 customers during the morning peak (8am to 9am) and evening peak (5pm to 6pm). For a store area of 396m<sup>2</sup> this equates to a peak hour trip rate of approximately 75 trips per 100m<sup>2</sup>, which seems reasonable for the type of convenience store which sells a variety of everyday needs.
- 3.2.3 The offices in the basement cover an area of 313m² and can accommodate approximately 30 people based on a ratio of 1 person per 10.2m². These people are likely to generate in the region of 15 trips in any peak hour assuming two hour peak periods in the morning and evening.
- 3.2.4 The number of existing residential units consists of three dwellings, one 3-bed flat and two 3-bed maisonettes. These are likely to generate approximately 9 trips in the peak hours, assuming two hour peak periods in the morning and evening.

### 3.3 Proposed Hotel Use

- 3.3.1 The proposal consists of 56 bedrooms:
  - Singles 10 bedrooms
  - Doubles 20 bedrooms
  - Twin 4 bedrooms
  - Triples 13 bedrooms
  - Quadruples 9 bedrooms
- 3.3.2 The 56 bedrooms can therefore accommodate 133 people. As a consequence the peak trip generation is likely to be in the region of 65 departures in the morning and 65 arrivals late afternoon; this assumes a two hour peak period.

### 3.4 Previous Use v Permitted Use v Proposed Use

- 3.4.1 A comparison of the existing and proposed shows that at peak times the hotel will generate less than the current uses, 65 peak hour trips as against the existing/extant uses with circa. 100 peak hour trips.
- 3.4.2 Further, the convenience store has a far greater potential to attract car borne trade than the proposed hotel use, and is therefore the proposals likely to have a beneficial effect on the public highway.

### 4 Travel Plan Statement

- 4.1.1 TfL guidance on travel plans is that for hotels consisting of less than 100 beds a Travel Plan Statement is required. The proposed development will comprise of 56 bedrooms with approximately 133 beds depending on the make-up of the triple and quadruple person bedrooms (i.e. the composition of double and single beds).
- 4.1.2 Therefore this section provides such a short statement setting out positive measures promoting sustainable transport.
- 4.1.3 Being an application for a hotel with 56 bedrooms in an urban area, very close to trains, buses and many local facilities, the following travel planning initiatives are to be provided:
  - Safe and secure cycle parking in the local area (location to be with the local highway authority);
  - No on-site car parking thereby discouraging car use;
  - The provision of the train and bus information within each bedroom; and
  - The provision of locally available cycling and walking maps within each bedroom.
- 4.1.4 The development site is located in an area with on-street parking controls and by not providing any on-site car parking it's considered that future employees and guests are unlikely to travel by private car to / from the hotel, and as such the proposals appropriately align with policy and will assist in providing a sustainable development.
- 4.1.5 It is intended that a planning permission condition (or obligation) will be agreed to maintain the number of cycle parking spaces that are available to future employees and guests at all times.

4.1.6 These hard and soft measures in association with the site's highly accessible location should result in a very sustainable development.

# 5 Conclusions

- 5.1.1 This Transport Statement has shown that the proposed hotel development has:
  - Good access to all main modes of transport;
  - Will have an enhanced level of easily accessible cycle parking;
  - Purposely not provided car parking spaces; and is
  - Well located for local attractions.
- 5.1.2 In terms of trip generation the proposed hotel use will generate a lower number of trips compared to the existing/extant uses. It is considered that the overall number of car trips which may be generated by the proposed hotel will be very low compared to the existing/extant uses which will be beneficial to the local road network.
- 5.1.3 Overall, it is considered that the site has a good level of transport sustainability, and that there are no reasons why the proposed development should not be permitted on transport grounds.
