2016/4383/P	D & C Sutherland	Cottage 2 134 Greencroft Gardens London NW6 3PJ	19/10/2016 11:05:50	NOOBCOM PAP	We live in Cottage 2 attached to Cottage 1 and in principle have no objection to the proposed stone balustrade on the existing parapet. However I am concerned as to how it will be attached as I can find no information in the application regarding this. It would be dangerous in a strong wind if it is simply cemented in place. I would think it would be necessary for the up rights and cross members to be bolted in place in some way. If this or some other method is used to secure the stone works we have no objection to the application. Thank you
