2016/4582/P	Bernadette Andruk and Massimo Perrone	13C Northington Street London WC1N 2NT	06/11/2016 17:20:22	COMMNT	<p>We are residents at 13C Northington Street and two of the freeholders of 13 Northington Street, a grade II listed building.</p> <p>25 John's Mews (also grade II listed) and 13 Northington Street are two halves of the same building and therefore the southern wall of our property runs all the way to John's Mews, adjacent to the proposed development.</p> <p>We are very concerned that the proposed extensive demolition and building works will cause structural damage to our southern wall and maybe to the whole building. As things stand at the moment, the mere passing of lorries on Northington Street make the whole of our building shake so we can only imagine what kind of impact such a demolition and subsequent rebuild would have on our property.</p> <p>Furthermore, the proposal seems to entail a lot of noise, pollution and extra traffic in this neighbourhood and will greatly inconvenience the residents of the surrounding streets, without any apparent benefit whatsoever to the community.</p>
