Subject: Camden Council Planning Application 2015/6455/P

Hello

I am a resident of Lymington Road is West Hampstead.

I am obviously objecting to the application submitted for 156 West End Lane for a number of reasons - many of which you will have heard before.

However, I ask for your assistance in a personal matter. Currently, my (albeit small!) flat basks in sunlight for the full day. I cannot see how a 7 story monster block meters from my window will pass the daylight / sunlight guiding principles.

The Anstey Home independent review of Daylight and Sunlight figures is based on assumptions about lighting data provided by the developer. No technical data or modelling information has been provided by the developer in the year since the original application. This is a cause for great concern and results in no one being able to determine the true impact of the proposal.

I request your assistance in ensuring that Camden Council commission a fully independent Daylight and Sunlight study, complete with comprehensive Sunrise to Sunset 3D overshadowing modelling for the proposals submitted, such that it is possible to establish the true impact on neighbouring properties, public amenities and the Designated Open Space in Crown Close.

And as such, I request you stop the official public consultation on Application 2015/6455/P commences until such time as this fully independent Daylight and Sunlight study is made available.

I look forward to your response.

Best wishes.

Vicki
